

A BIKE THAT DARES YOU TO BE DIFFERENT

In rider appeal, the FZX750 is cruiser or custom-bike; sportster or street burner. In engineering terms, it's Yamaha's "Genesis concept" applied in a different way.

Motor and chassis have obviously been designed to complement one another but the FZX engine has far more of a styling role than its FZ750 cousin.

The steeply-inclined parallel-four cylinder block visually parallels the box-section upper chassis rails to produce a sleek, yet aggressive profile. That same motor/chassis combination, however, makes the FZX handle like a true sports bike, thanks to the forward weight-bias of the engine and the inherent high lateral-rigidity of the frame.

For more information on the FZX750, the bike that dares you to be different, contact your nearest Yamaha dealer or write to Motorcycle Sales Division, Mitsui Machinery Sales (UK) Ltd, Oakcroft Road, Chessington, Surrey KT9 1SA.
